THE AL-KO AIRSAFE CONCEPT

Housing

- Smooth interior
- Double glazed isolation panels for maximum noise absorption

Silencer system

- Low noise levels thanks to an integrated silencer
- Fulfills the recommendations of VDI Directive 2081

Fan

- Perfectly matched EC fan
- Maximum energy efficiency with minimum noise

HEPA filter

- High quality HEPA/suspended matter filter for reliable separation
- Filter technology used in the medical field

Prefilter

- Optimal protection of the downstream HEPA filter
- Low energy and maintenance costs thanks to bag filter with large dust storage capacity

Installation

- Mobile design with 5 m power cable
- Plug and play with 230 V plug
- Quick and simple installation

Technical information:

AL-KO AIRSAFE

AIRSAFE 1200 for surfaces up to 75 m².

Airflow low 600m³/h and high 1200m³/h.

AIRSAFE 1600 for surfaces up to 100 m².

Airflow low 800m³/h and high 1600m³/h.

OTHER ADVANTAGES:

- Easy filter changes, thanks to professional filter-change indicators based on dust levels.
- Rear-side inspection door.
- Easy to operate, and infinite air flow adjustment possibilities.
- Hygiene timer for maximum security.
- More than 2 000 m³/h air filtered capacity thanks to its Power function.
- Design with smooth wall interiors, outer powder-coated metal finishing.
- Installation can be anywhere, thanks to front air suction vent, and air outlet on top.
- Longer life service for filters, thanks to a raised air suction vent that prevents fluff entering the unit.

AerPRO CEILING PANEL

EFFECTIVE AIR PURIFICATION

The AerPRO ceiling panel gives us healthy air, and is effective in fighting bacteria, spores, viruses and fine dust particles. The AerPRO ceiling panel is a professional air purifier. It purifies and disinfects the air in a space through tried-and-true technologies including UV-C light, titanium dioxide and ionization.

BENEFITS:

- Offers the most improvement in air quality.
- Effective addition to the measures to create a 'COVID-safe' environment.
- Purifies the air, cleaning it from microorganisms, fine dust particles, and pollen.
- Not harmful for the environment, safe to use (no ozone is used or released).
- Neutralizes unwanted smells.
- Ensures cool and healthy working and common spaces.

CONSIDERABLE IMPROVEMENTS IN AIR QUALITY

QUIET OPERATION

DESIGNED FOR SAFE 24/7 USE

VERY GOOD PRICE/QUALITY RELATIONSHIP

HOW THE AERPRO CEILING PANEL WORKS

The AerPRO ceiling panel disinfects the air in spaces up to 75m³. Placing more devices ensures filtration for larger spaces. The AerPRO ceiling panel is compatible with every ceiling system. The air is suctioned by a very quiet ventilator and

placed in a space treated with titanium dioxide as photocatalyst, and where two Signify UV-C lamps of 16 watts each disinfect the air. This kills viruses, spores and bacteria, and the combination of titanium dioxide and UV-C light reinforces the action of the light. Then, the already disinfected air passes through an ionizer, which blows negative ions into the space. The air leaving the AerPRO ceiling panel is healthier for everyone in that space.

Discover the unique combination of the AerPRO ceiling purifier with the **AL-KO AIRSAFE**, for effective protection against aerosolized viruses.

Technical information:

AerPro
Suitable for spaces up to 75 m ³
Maximum air flow 125 m ³ air per hour
UV-C Lamp 2x 16 watts
